

PHYSICIAN RESOURCE GUIDE

Example Consultation Summary

An example of the clinical communication you can expect following your patient's evaluation.

Every referring provider receives a clear, clinically organized summary designed to support continuity of care and keep your office informed of your patient's hearing health and treatment plan.

PATIENT	Jane Smith	DOB	January 12, 1968
REFERRING PROVIDER	Dr. Michael Jones		
REASON FOR REFERRAL	Progressive hearing difficulty and bilateral tinnitus.		

Subjective

The patient reported gradually increasing difficulty understanding conversation, particularly in background noise, along with persistent bilateral tinnitus affecting concentration and sleep. Hearing, medical, and lifestyle history were reviewed in detail.

Objective

Comprehensive audiologic evaluation, including pure-tone audiometry and speech testing, revealed bilateral sensorineural hearing loss consistent with the patient's reported difficulties.

Assessment

Findings are consistent with the patient's communication concerns, with tinnitus further contributing to reduced quality of life in quiet environments.

Plan

- Patient educated on hearing loss and tinnitus, with treatment options reviewed.
- Individualized plan discussed, including hearing technology and Tinnitus Retraining Therapy (TRT).
- Communication strategies reviewed for everyday listening situations.
- Follow-up appointment scheduled to continue care.

We appreciate the opportunity to participate in your patient's care and will continue to communicate clinical findings, treatment recommendations, and progress throughout care.
